

TaaS

Smart. Simple. Scalable.

Introducing Tech-as-a-Service (TaaS)

With technology transforming at a record pace, offering strategic and flexible solutions is critical to staying ahead of the competition and growing your business. Tech Data's Tech-as-a-Service is a comprehensive, flexible solution that bundles hardware, software and services into a single subscription price. Best of all, customers can scale up or down throughout the course of their subscription term - allowing them to adjust to changing business conditions. Our newest offering combines Tech Data's unmatched, unique expertise and specialized services with our operational and logistical strength.

ENDPOINT SOLUTIONS

End-To-End Solutions

Our broad portfolio offers any and all endpoint products – client, peripherals, phones and more

Flexible Subscription Models

Allows for scaling up or down throughout their subscription term

Unparalleled Services Capabilities

Offers the ability to white-label so you can expand or supplement your current products, services and solutions

ENTERPRISE SOLUTIONS

On-site Capacity

Delivers unlimited storage and/or server capacity onsite, managed by the customer.

Improved Asset Utilization

Payment is not fixed but is based on use, resulting in a significant cost savings.

Simplified Growth Logistics

Includes a buffer for growth so extra capacity is always available onsite
