

AgiliProve

Structured Process Management for Micro Focus ALM

*Eliminate Paper-Based Processes that are Expensive and Inefficient
Get a controlled, enforceable workflow with electronic signatures.*

Use Tech Data AgiliProve and Micro Focus Application Lifecycle Management (ALM) for a streamlined paperless Test Management process that lowers validation testing costs.

Micro Focus Application Lifecycle Management (ALM)

Micro Focus ALM is the industry-leading application lifecycle management tool that provides the ability to:

- Gain real-time visibility into requirements coverage and the associated defects
- Better understand business risks related to software quality assurance
- Collaborate using a unified global platform
- Centrally manage manual and automated test assets
- Standardize testing for repeatable quality processes that boost productivity

With AgiliProve, Micro Focus ALM becomes a useful tool for regulated industries, including native version control, shared libraries and rich reporting capabilities.

Tech Data AgiliProve extends Micro Focus ALM to provide industry best practices, security, business rules, and approval flows. These capabilities enable Micro Focus ALM to be used in regulated and validated environments.

Tech Data AgiliProve can be configured to meet any internal Standard Operating Procedure. Additionally, Tech Data can provide valuable validation documents to further reduce costs when starting to use ALM or upgrading.

Use Tech Data AgiliProve and Micro Focus ALM for a streamlined paperless Test Management process that lowers validation testing costs.

Full featured, on-demand reporting provides requirement and test tracking, traceability, management dashboards, and critical targeted reports during regulatory audits.

AgiliProve Benefits

- 21 CFR Part 11 compliance
- Flexible workflow configuration
- Dramatic reduction in costs
- Can be validated quickly with less cost
- Officially endorsed by Micro Focus
- Enables process standardization and repeatability

New Features:

- Approvers view
- Accessible via web interface
- Dynamic approval time & configuration
- Streamlined initialization
- Extended audit logging

Tech Data AgiliProve Supports Regulatory Compliance

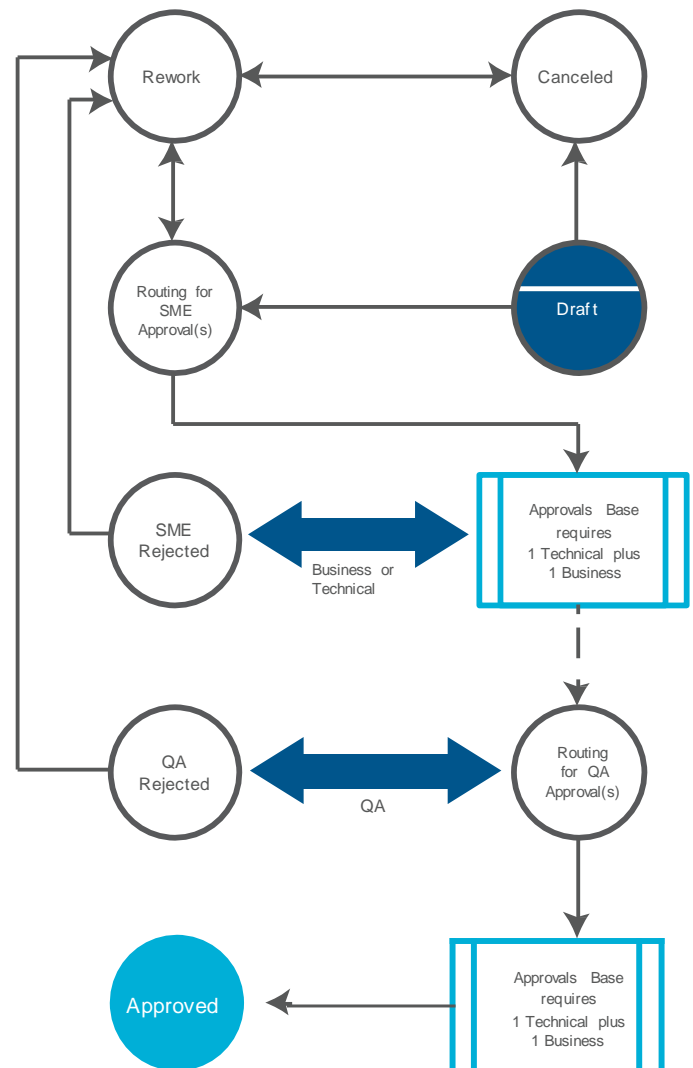

Tech Data AgiliProve is the controlled workflow from Tech Data for Micro Focus ALM. Based on Micro Focus' Open Test Architecture and Workflow APIs, it ensures that Micro Focus ALM conforms with life science and health regulatory requirements and industry guidelines such as 21 CFR Part 11, GAMP5, SOX, and HIPAA.

Tech Data AgiliProve provides regulatory compliance by implementing security, business rules, process flow, and electronic signatures to fulfill CFR 21 Part 11 requirements. It also ensures a repeatable testing process and optimizes review and approvals across your organization.

Customers all over the world, including most of the world's largest pharmaceutical companies, use Tech Data software and services every day.

System requirements

- Micro Focus ALM v12.53 or higher
- Microsoft® Internet Explorer (ALM Integration Client)
- AgiliProve Server
 - Windows Server 2012 or Higher
- AgiliProve Web Client (Browser Agnostic)
