Simplify your Customers' Security Operations with McAfee and IBM.

Companies worldwide have transitioned into a remote workforce which has led organizations scrambling at purchasing and securing the abundance of Cloud Services. The additional cloud services and remote workforce have increased data sprawl and endpoint/cloud threats to an unparalleled high. In addition, the growth of remote workforces has left many IT environments vulnerable to attack.

IBM Security and McAfee have teamed up together to help protect the global remote workforce through:

- Connected Architecture
- Analytics
- Prioritization of Resources
- Automation
- Threat Detection and Event Correlation
- And More

By integrating IBM **QRadar – Cloud Pak for Security** with McAfee’s **MVISION** Device-to-Cloud Platform customers are further protected from attacks.

IBM QRadar - Cloud Pak for Security is an open security platform that connects to your existing data sources to generate deeper insights and enables you to act faster with automation.

Whether your data resides on IBM or third-party tools, on-premises or multiple cloud environments, the platform helps you to find and respond to threats and risks — all while leaving your data where it is.

Uncover hidden threats, make more informed risk-based decisions and respond to incidents faster.

McAfee MVISION is a new portfolio family featuring McAfee innovations that offer a single point of visibility, comprehension, and control across your entire digital estate.

McAfee MVISION is the first cloud-based product family that protects data and stops threats in the cloud across SaaS, PaaS, and IaaS from a single, cloud-native enforcement point.

Industry recognized endpoint and cloud security to protect data where it lives.

McAfee and IBM’s newly integrated solution provides:

- **Visibility** – Into your organizational threats and analytics while providing a more robust security posture
- **Simplicity** – Enabling your SOC to break down complexities and silos within your organization
- **Investigation/Remediation** – Streamlined approach within a SOC to begin investigations and understanding outcomes.
- **Control** – Identifying and responding to threats quickly within organizational SOP compliance.

McAfee/IBM SKU Ordering Information:

IBM QRadar	Description
D05M2ZX	IBM Cloud Pak for Security (Gen 3) 100 Resource Unit License + SW Subscription & Support

McAfee ePO (ON Prem)	Description	McAfee MVISION ePO	McAfee API License PL1
MV6ECE-AA-DA	MVISION Protect Plus EDR for Endpoint 30 Day retention	MV6ECE-AA-DA	PL1ECE-AA-AA
MV7ECE-AA-DA	MVISION Protect Plus and EDR Premium for Endpoint 90 Day retention	MV7ECE-AA-DA	PL1ECE-AA-AA
SAAS ONLY	MVISION Premium	MVPECE-AA-DA	PL1ECE-AA-AA
SAAS ONLY	MVISION Complete	MVCECE-AA-DA	PL1ECE-AA-AA
SAAS ONLY	(Addon to MVC) MVISION CSPM & CWPP Resource Pooled	C62ECE-AA-AA	PL1ECE-AA-AA
